DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael G. Savage on April 18, 2005.

IN THE CLAIMS

a) Cancel claim 22

Allowable Subject Matter

2. Claims 2-21 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for the indication of the allowability of claims 2-21 is:

Regarding claims 11-21 and 2-10, the prior art does not teach or fairly suggest in combination with the other claimed limitations a wall plate comprising a printed circuit board having a Universal Serial Bus (USB) hub circuit connected thereto, wherein the printed circuit board is connected to the second surface and is recessed in an opening in the building wall when the plate is mounted on the building wall.

These limitations were found in claims 2-21, and are neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments, see the RCE filed on April 11, 2005, with respect to claims 2-21 have been fully considered and are persuasive.

In response to the applicants' argument, the Examiner agrees that neither Kabenjian (US 2004/0076048) nor the cited prior art teach, disclose or suggest a wall plate comprising a printed circuit board having a Universal Serial Bus (USB) hub circuit connected thereto, wherein the printed circuit board is connected to the second surface and is recessed in an opening in the building wall when the plate is mounted on the building wall.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rubinstein et al (US 6,880,020), Miller et al (US 6,566,602), Chang (US 6,050,849) and Sanner (US 6,843,681) disclose a wall plate with USB connectors.
